Subject: PMS#2

Stephanie,

We discussed (after the call) when to move PMS#2 south to PMS#2 north. The agreed option (as it wasn't specifically outlined in the plan) was once the dredging is complete on the south side of the "no dredge" area, the monitor would be moved north. The plan states "as the dredging moves north", but not much more than that.

Please let me know if this isn't appropriate or if you concur.

Thank you.
